MUKI paving: The product line

MUKI is an active lighting pavement system made of concrete, glass and LED lights combining creativity and humor. MUKI has many variations in function which makes it applicable as moodlighting, lighting marker or directive point, even as a game or digital screen. The mottoes are: coexistence, play and natural activity.

The items of the product line, from the smallest to the biggest part:

S - miniMUKI, M - MUKI_pix, L - MUKIline, XL - MUKIdeluxe, XX - MUKIpro

miniMUKI

MUKI_pix

MUKIline

MUKIdeluxe

MUKIpro

miniMUKI

The smallest family member is miniMUKI, which can be fitted into general small cobble stone systems. The totally waterproof structure is suitable for use in public and private spaces as a design element, directive point or signal. Simple graphic forms can add different mood and function (icon, text, ornament).

The product can also be ordered with fluorescent graphics instead of active lighting.

MUKiline

MUKiline is a modular pavement system which offers static mood lighting with LED technology. Its linear graphic design is simple, but makes spectacular appearance in both floor and wall design. The waterproof construction makes its use possible in garden, terrace, bathroom or a kitchen's paving as well.

MUKIdeluxe

A concrete pavement system working as digital screen, which can show pixel based graphics/pictures. The lighting mechanism can be constant or play simple animations. You can use it to display informations, for communication or even advertising. The moving lights will catch people's eyes and may also invite to interaction.
